Carbon sequestration in shelterbelts surrounding Alberta cropland

Stephanie Flaman¹, Living Data Project^{1,2}

¹ University of Regina

² University of British Columbia

27. September 2022

Data collection	Yes, the data comes from Gross et al. 2022.
------------------------	---

Hypothesis

How much carbon does the shelter belts of Alberta sequester and what is the benefit of this?

Dependent variable

Amount of carbon stored in each individual plant.

Conditions

Pending.

Analyses

TBD.

**Outliers and
exclusions**

TBD.

Sample size

Sample size for this mini project is 10 (hedge grows and shelter belts).

Other

Study type Observational/archival study
